OSHA Q&A

the following links correspond to specific responses provided by OSHA during the Q&A portion of the webinar:

- Updated OSHA Penalties: <https://www.osha.gov/penalties>
- Scissor lifts are not regulated under the aerial standard (29 CFR 1926.453). OSHA classifies scissor lifts as a type of mobile scaffold and is thus covered under the specific requirements for mobile scaffolds in §1926.452(w) and the general requirements for scaffolds in §1926.451. Links to relevant LOIs on this topic can be posted in chat.
