Help Prevent Suicide...

1 Reach Out

If you notice warning signs of suicide in someone you know, reach out to them. For example, "I've noticed lately that you are sitting alone at lunch and avoiding all of us while we're at work, and I am concerned." You can also ask them directly, "Are you thinking about suicide?" As a manager, do not put them into a position of responsibility or put them in a position to attempt suicide.
