

# The IMPACT

1. The first impact of the project was the immediate increase in the number of publications in the field of artificial intelligence and machine learning.

2. The second impact was the significant increase in the number of citations for the research papers published during the project period.

3. The third impact was the establishment of a strong research network between the participating institutions and researchers.

4. The fourth impact was the development of new research projects and collaborations that have continued beyond the project's duration.

What made it a success?
